

Own Boat Training ~ Motor Cruisers

An option for those with access to their own craft is to undertake training on that craft rather than a school boat.

You can either undertake training based around RYA courses or we can structure a bespoke course for you addressing the particular areas that you wish to deal with.

Often we are able to do a bit of both with perhaps some extra time within a Dayskipper Practical course spending specific time on the use of radar for collision avoidance and position fixing.

We are also able to spend time looking at the safety equipment and electronic kit that you have on board giving impartial advice that can help you make the most of it whilst giving realistic advice on what items you might consider buying.

As an added benefit you will find that Own Boat Training is generally more cost effective with the obvious added benefit that by training on your craft 100% of what we cover is relevant to your particular needs.

Case studies

- **38ft Bavaria:** Half day training coupled to ICC assessment.
- **34ft Sealine:** Four day Dayskipper Practical course for owner, wife and two sons. Course included passages planned and executed to Weymouth and Cowes from Poole and some night navigation.
- **Botnia Targa 33ft:** Handover induction to new owner followed by combined Helmsman/Dayskipper course.
- **Princess 20m:** Coastal Skipper Course and Exam for new owner and partner. Extra time spent on ensuring the fitted electronics including Radar were fully understood.
- **Linssen 45ft:** Accompanied delivery from Mahon to Antibes with time spent on navigation, passage planning and other areas as requested by the owner.
- **Sunseeker Predator:** 3 day bespoke course leading to ICC Assessment and CEVNI Exam. Advice to owner on coding and management of vessel.
- **Fairline Targa 34:** Yachtmaster preparation course lasting 4 days and examination. Provided experienced crew for the exam.

Note: See our separate document detailing the kit you need on board and our Terms & Conditions covering own boat training.
